I am writing you this letter in thanking you for all the work you have done in making our trading system a reality for us.

We had used other programmers but they could not get it to work the way we wanted it to work and were always asking to make changes because of limitation on trade station. It has cost us a great deal of money and in the end did not have any think that was working like we wanted our rules to work.

What we found in your services is that you not only can think like a programmer but also know and grasp the complexity of the market so when you had us have a webinar we could show you on the charts that you would put up as to were we wanted to get in and out of the market. You could get the scene of the complexity of our system and understand how to write it into the tradestation system for us to make our dreams come true.

If we had found you first we would have saved a great deal of money in programing.

Thank you in all that you have done for us.
