

May 15, 2009

This is in reply to your request for a letter of reference to support becoming a certified Easy Language provider on TradeStation.

We have used your services to correct and enhance our Easy Language strategies and indicators since the beginning of 2009. We are very pleased with your knowledge and responsiveness, and we find you very easy to work with. You clearly have a deep understanding of both Easy Language and the core concepts of trading.

As you are aware, our strategy presented some unique challenges due to its real time tick level functionality, including the need to examine and in some cases re-create core EasyLanguage functions that did not operate as planned in our environment. We also appreciate your frequent unsolicited commentary on how both our code and strategic approach can be improved.

We also enjoy your many contributions to the forums under your username "OpusTrader". We and others have learned a great deal from your postings.

We would recommend you without reservation to others seeking EasyLanguage programming assistance and/or help in developing practical strategies that can be executed in real life. I would be happy to do this personally should you wish.

Keep up the good work!

Yours very sincerely,

A handwritten signature in black ink that reads 'William A. Zemlak'. The signature is fluid and cursive, with a large loop at the end of the last name.
